SCREWS FOR ALL SEASONS

GOOD ZINC 200 HOUR RED RUST PROTECTION

Designed for outdoor use! This innovative plating process has proven to be the "Gold Standard" in red rust protection. This gold color plating provides almost ten times the red rust protection compared to the common silver zinc screws which are designed for indoor use only.

All screws have oversized washers and tall heads.

BETTER 1,000 HOUR Rezist™

Screws Resist Red Rust up to 1,000 hours!

Due to New Technology All REZIST Screws have been upgraded to resist red rust up to 1,000 hours. In-house salt-spray tests performed in accordance with ASTM-B117 procedures.

All screws have oversized washers and tall heads.

BEST 410 STAINLESS STEEL

410 is a stainless that can be heat treated. It provides a good balance between anti-corrosion properties and steel penetration ability. Using stainless fasteners adds value to your project. The increased cost is a minimal percentage when compared to the total cost of the installation. Virtually eliminates staining. Magnetic, so works with magnetic nut setters.

All screws have oversized washers and tall heads.

Look!

HEAVY DUTY SCREWS #12x 1-1/2 AVAILABLE IN ZINC, REZIST AND STAINLESS STEEL

This is a thicker shank, tall head screw engineered to be strong and provide a solid installation. The #17 point is designed to remove debris while driving into material.

All screws have oversized washers and tall heads.

OPTIONAL BONDED ALUMINUM SEALING WASHERS

On #10 x 1½ and #12 mill finish only.
(Not intended for roofing applications.)
