

WayPig One-Way Gate

Loading hogs is made easier with a Raytec One-Way Hog Gate. Locate the gate anywhere you want to control the direction of hog travel—alleys, fences and loading chutes. Once the hog passes through the gate, it cannot return and disrupt the flow of desired travel, or back off a truck to contaminate your facility. No need to use an extra person on the truck.

Raytec's hog gate is 18 inches wide to fit most alleyways and has flanges for flush mount or slide-in installation. The gate's heavy-duty construction includes durable torsion springs for many trouble-free years of use.

WayPig Hanging Scale

Here is a small, adjustable scale for weighing pigs and other things under 60 lbs. A slip chain which fits around an animal's leg is furnished with each scale. Or use it with a container. It can be adjusted to offset the additional weight. The height of the scale is also adjustable so it can be used in almost any location. The user need only slide it over a sturdy board and move the pipe to the desired height. Featuring a large, easy-to-read scale face with tare-weight pointer, the Raytec Hanging Scale has a double spring mechanism rather than the typical single spring.
